Evening Brief

Date: August 2nd, 2021

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	PL 3	Light Initial Attack Activity
National	PL 5	New Fires and Acres: 34 fires for 32.51 acre / 400 acres Large Fire Growth

Weather:

Any leftover monsoonal moisture in far eastern areas of the Great Basin will be moving out of the region today, as high pressure over southern Nevada builds northward, bringing a return to seasonable warmth and dryness from southwest to northeast this week for most areas.

But Thursday, a weak low will approach from the Pacific Northwest, bringing clouds and cooler temperatures again to the Central Idaho Mountains, along with a few showers. Further south it will be drier with southwest breezes of 15-25 mph later this week continuing to gradually dry out most of Nevada and eventually western Utah. But by this weekend, another cold front will move through Idaho with more clouds and cooler temperatures, and possibly some light showers, while slightly cooler, but continued dry conditions persist south of the I-80 corridor. By the end of the weekend, monsoonal moisture may approach southern areas once again.

Fuels/Fire Potential:

Despite the warming and drying trend, most fuels have fallen below critically dry levels, as it will take several days of drying to overcome the recent rainfall and prolonged high humidity in most areas. Fuels across western Nevada will be the first to dry back to near critical levels by later this week, while areas further north and east will take longer to recover. In the Central Idaho Mountains/Western Wyoming, where most ERC's have fallen towards the 50th percentile, there could be more light precipitation later this week to cap off any significant drying.

Small holdover fires are most likely across the heavier fuel loaded mountainous areas of Nevada, where the most prolonged warming and drying is expected.

Resources:

Aviation within the Great Basin

- 0 VLAT, 0 LATs, 0 CL-415
- 25 SEATs, 0 FB, 9 AA, 0 ASM, 1 LP
- 10 Type 1 Helicopters / 4 Comm.
- 7 Type 2 Helicopters / 4 Comm.
- 17 Type 3 Helicopters / 10 Comm.

Crews Committed within the Great Basin

- 8 IHCs / 1 Available IA / 2 R&R
 - 12 Type 2IA / 0 Available / 2 R&R
